## UREA

Urea is the most concentrated solid nitrogen fertiliser and has become the world's major source of nitrogen

Appearance	White prills
Total Nitrogen (N), min.	46.2%
Biuret, max.	1 %
Ammonia, max.	0.03%
Moisture content, max.	0.3 %
Granulometric composition: Under 1 mm, max. 1-4 mm, min. Under 5 mm, min.	3 % 94 % 100 %
Granule static strength, min.	0.7 kg/granule
Friability	100%

### ADVANTAGES:

- Supplies continuous, long-lasting effect in nitrogen plant nutrition during the whole growing period
- It has excellent storage properties

### APPLICATION:

- Appropriate for both ground and foliar application
- The 100% solubility of urea provides its total dissolution so it can be applied when rain is forecasted, applicable by irrigation

SAFETY: Easy to handle in big bags and bulk.

The MSDS complying REGULATION (EC) №1907/2006 is available on [www.URALCHEM-ASSIST.de](http://www.URALCHEM-ASSIST.de)
